Special Issue: State of the Art of Trace Element Determinations in Plant Matrices. A Collection of Papers Presented at the Workshop on the State of the Art of Trace Element Determinations in Plant Matrices, Brussels, Belgium, 28–31 May, 1994

Preface 1

State of the art of trace element determinations in plant matrices: Determination of the chemical elements in plant matrices, an overview
E.I. Hamilton (UK) 3

Sampling of plant material for chemical analysis
W.H.O. Ernst (The Netherlands) 15

Procedures and precautions used in sampling techniques and analysis of trace elements in plant matrices
F. MacNaeidhe (Ireland) 25

Strategies in sampling and sample handling in the context of large-scale plant biomonitoring surveys of trace element air pollution
H. Th. Wolterbeek, P. Bode (The Netherlands) 33

Sample preparation (cleaning, drying, homogenization) for trace element analysis in plant matrices
B. Markert (Germany) 45

Basic approaches and methods for quality assurance and quality control in sample collection and storage for environmental monitoring
G. Wagner (Germany) 63

Open digestion of some plant and fungus materials for mercury analysis using different temperatures and sample sizes
M. Lodenius, E. Tulisalo (Finland) 81

Critical discussion of trace element analysis of plant matrices
M. Hoenig (Belgium) 85

Matrix problems in the certification analysis of botanical materials by neutron activation analysis
E. Damsgaard, K. Heydorn (Denmark) 93

The use of X-ray fluorescence spectrometry for the analysis of plants, especially lichens, employed in biological monitoring
D.H.S. Richardson, M. Shore, R. Hartree, R.M. Richardson (Canada) 97

Determination of metals and metal fluxes in algae and fungi
C. White, G.M. Gadd (UK) 107

Determination of trace elements in foliar tissues of forest trees for nutrition diagnostics
A. Clément (France) 117

The elemental composition of vegetation and the possible incidence of soil contamination of samples
R. Bargagli (Italy) 121

Use and abuse of heavy metal bioassays in environmental monitoring
M.R.D. Seaward (UK) 129

Determination of cobalt in vegetable animal foodstuffs by differential pulse adsorptive voltammetry using α-benzil dio me
S. Giroussi, A. Vou.garopoulos, A.K. Ayiannidis, J. Golimowski, M. Janicki (Greece, Poland) 135

Conclusions of the workshop — improvements of trace element determinations in plant matrices
Ph. Quevauviller (Belgium) 141
